About

I intruduce myself as a passionate self-taught Web Application Developer. I love to code with JavaScript, Php and Python. Expreienced in both front-end and back-end framworks and libraries like Bootstrap, Codeigniter, JQuery, Ajax and also interested in Django and Laravel.

Currently I am researching and learning to become an Advanced Javascript Developer and studying over different frameworks like Angular.Js and Node.js. I prefer working in the back-end though I have a good grasp over the front-end part.
